

RADIATOR CLEANING KIT

Safety Side Nozzle Tip Kit

The Safety Side Nozzle Tip Kit cleans radiators, condensers, air filters and heat exchangers with compressed air. This accessory can help extend the life of air filters between services, reduce coolant temperatures by blowing debris out between radiator fins and enhance the cooling capacity of your air conditioning condenser by removing debris to improve airflow.

ST17-KIT Radiator Cleaning Tip Kit

- Beveled tip to prevent damaging delicate aluminum fins and tubing
- O-ring allows for rotation of tip, no need to twist your arm
- Design optimizes airflow, more cleaning power
- Adapts to Typhoon or CEG blowgun threads

**Attaches to any Typhoon
or CEG Extension**
